**Diamond Knowledge Base**

**Easy File Renaming Utility**

Some customers want or need to have specific file naming for batch exports and imports or just labeling data files in general. The following utility may help with that process. It is not made, distributed or endorsed by Diamond traffic Products but is here for reference for those customers looking for a way to do file naming. The following link will lead you to a third party site that has no relationship to Diamond Traffic. The software is not tested or guaranteed by Diamond Traffic.
