

## **Diamond Knowledge Base**

### **Centurion Version History 1.05**

1.05 02/03/03	New function: Bin Table Editor. This is a complete Axle, Speed, Length, Gap, and Headway bin table Setup, Edit, View and Print function. It can be selected either from the Counter menu or from the Site Setup window. New function: Export Direct to Excel. This function is accessed by clicking on the excel button from the export window. Centurion will create a custom Excel spreadsheet and then automatically load it into Excel for immediate viewing. Added full support for the Uni-Lim and Apollo Flash memory and the UPP MMC. Manual Registration automatically selected if FTP fails. Improved support for multi-user and heavy single user database access (NETDIR and PRIVATEDIR functions fully supported). Centurion now creates BDE aliases at runtime (this has been removed from install).
