Diamond Knowledge Base

Centurion Version History 1.26

Build #0001 02/01/05	This version adds linking to the Unicorn, Phoenix, Pegasus, & TTC-540 counters with a V2.80 or higher EPROM. Note that no WIM functions can be set or used, but all other counter operations are fully functional. There has also been the following misc. other changes: Fixed importing problem importing TTC files that have been exported by TrafMan (halts at 25%). Changed to use a Year-Month sub-directory on the Source directory. Also slightly renamed data files in Source. Fixed "Epoch" setting on Report Generator (also on Ask Counter Time/Date setting). Changed to use military time on Report Generator (everywhere). Fixed problem with lanes 8 and higher on certain reports. Added "Enabled Autopolling" setting on Parking System – Counter Setup screen.
