

## **Diamond Knowledge Base**

### **What is the difference between the Centurions CC/Parks/Field/Lite?**

Centurion is separated into different versions to make it easier for agencies and users to work more efficiently. Our City/County (CC), Parks & Recreation, and Field version (for on site programming and downloading) are all utilized for their respected fields of use. Our Lite version is for the Pocket PC and is compatible with all of the other Centurion Packages.
